January 10, 2008

Dear Homeowner/Business Owner:

The Illinois Tollway is continuing the Reagan Memorial Tollway (I-88) Rebuild & Widen Project – Aurora Toll Plaza to Orchard Road as part of the Congestion-Relief Program – *Open Roads for a faster Future* – to reduce travel times.

As part of the scope of this project, a new bridge is being erected to reduce congestion for drivers traveling over the Fox River. One of the first steps in completing this work is to construct foundations for the new span. Weather permitting, the Tollway's contractor plans to begin pile driving operations Monday, January 14, 2008. Pile driving consists of pounding lengthy steel beams into the soil, to bear on stronger soils buried dozens of feet below. This operation will generate loud repetitive noises and some ground vibrations. This work should be completed in two weeks and is scheduled during the daytime on weekdays.

We apologize in advance for any inconvenience you may experience during this operation and thank you in advance for your patience. If you have any questions related to the project, please call me at (630) 241-6800, ext. 3806

Sincerely,

A handwritten signature in black ink that reads 'Bunny Anderson'. The signature is written in a cursive, flowing style.
